Introduction

Stabilimento di Brozzo

Stabilimento di Tavernole

Stabilimento di Vestone

Stabilimento di Ponte Caffaro

**Ghidini Pietro Bosco**, dal 1929 una lunga storia di maniglie e coordinati. Lo sviluppo dell'azienda, che nasce addirittura nel secolo scorso, si inserisce nella operosa tradizione artigianale, prima, ed industriale, poi, che caratterizza la Val Trompia. Ghidini uno dei nomi più diffusi nella vallata e quindi dalla cascinetta in località Bosco, dove si svolgeva una impegnativa seconda attività, Pietro mutua il soprannome che lo distingue.

Nel 1929 Pietro Ghidini detto Bosco inizia la produzione di maniglie e posate in ottone, e via via, con il crescere della famiglia potenzia la fabbrica sino alle dimensioni di una moderna azienda.

Nel 1950 l'ingresso in azienda dei figli porta, dapprima, alla creazione dei nuovi stabilimenti ed inizia il costante processo d'innovazione tecnologica.

Attualmente, una serie di più recenti acquisizioni impone l'organizzazione di una più vasta realtà produttiva riunita sotto il marchio **Ghidini Group**.

Nel nuovo gruppo imprenditoriale sono quindi oggi compresi:

■ **Ghidini**, il marchio storico che ha sede a Brozzo Val Trompia in uno stabilimento che occupa 18000 mq e con unità produttive a Tavernole e Vestone (BS).

■ **Ghidini Aluminium**, un nuovo marchio nato dall'acquisizione di un produttore specializzato nella realizzazione di maniglie d'alluminio. La nuova realtà produttiva localizzata nello stabilimento di Ponte Caffaro (BS).

■ **GM**, per la produzione di maniglie e coordinati destinati al contract ed alle grandi forniture per le industrie del settore del serramento.

■ **De Venieri**, una produzione creata, con maestri artigiani locali, per riedicare forme e materiali delle antiche maniglie della tradizione.

Il nuovo assetto di **Ghidini Group** risulta quindi essere un sicuro riferimento per il settore riunendo in un solo produttore il più vasto catalogo di soluzioni tecniche e formali per maniglie e coordinati in ottone, bronzo, acciaio inox, lega di zinco, alluminio, nylon e ferro.

**Ghidini Pietro Bosco**, a company which makes handles and co-ordinates, with a long history dating back to 1929. Val Trompia, a region at the foot of the mountains whose streams provide easily available hydraulic energy, an area where many workshops rapidly developed alongside the more typical agricultural activities of the mountains.

The history of our company results from this industrious tradition of both skilled labour and agriculture. Ghidini is one of the most typical names in the valley so Pietro took his nickname, for which he has become well-known, from his small farm at Bosco where he also worked.

In 1929 Pietro Ghidini, also known as Bosco started manufacturing brass handles and cutlery and gradually, as the family grew the factory developed until it reached the size of the modern company.

In 1950 the sons entered the company which first of all led to the creation of new factories and also started a constant process of technological innovation.

Today a series of more recent acquisitions has made it necessary to organise a much larger manufacturing reality reunited under the **Ghidini Group** trademark. Today the new business group therefore includes:

■ **Ghidini**, the historic brand based in Brozzo Val Trompia in a factory which covers 18,000 with other factories in Tavernole and Vestone (BS).

■ **Ghidini Aluminium**, a new brand which comes from the takeover of a manufacturer specialised in making aluminium handles. These are manufactured in the factory in Ponte Caffaro (BS).

■ **GM**, which manufactures handles and coordinates for contracts and large supplies for industries in the window and door frames sector.

■ **De Venieri**, a product created by local craftsmen, to re-edit forms and materials of the ancient tradition of the handles.

The new structure of the **Ghidini Group** is therefore a sure point of reference for the sector with a single manufacturer offering a wide-ranging catalogue which answers all technical and formal needs with regard to handles and co-ordinates made of brass, stainless steel, zinc alloy, aluminium, nylon and iron.

# CERTIFICATE

for the management system  
according to ISO 9001:2008

The proof of the conforming application with the regulation was furnished and in accordance with certification procedure it is certified for the company

**Ghidini Pietro Bosco S.p.A.**  
**Via Pietro Ghidini, 32/34**  
**I – 25060 Brozzo di Marcheno (BS)**

## Scope

**Design, production and sales of handles and equipments  
for doors and windows.**

Certificate Registration No.: TIC 15 100 64249

Valid until: 2015-11-29

Valid from: 2013-01-08

Audit Report No.:

3330 272W G0

Initial certification: 2006-11-30

This certification was conducted in accordance with the TIC auditing and certification procedures and is subject to regular surveillance audits.

Una lunga tradizione di ricerca e realizzazione, tipica delle produzioni protoindustriali d inizio secolo, accompagna sin dalla fondazione la storia della Ghidini Pietro Bosco.

Il primo fondatore era un valente artigiano capace di elaborare nuove forme e un attento ricercatore di innovative soluzioni tecnologiche e costruttive. Dal 1929 via via Ghidini ha sviluppato costantemente questa propria peculiarit strutturando al proprio interno un permanente laboratorio di ricerca: Ufficio Esperienze Ghidini, dedicato allo sviluppo di nuovi prodotti ed alla definizione delle pi appropriate tecnologie di produzione.

Dagli anni Ottanta poi l'attenzione all'attivit di progetto si propriamente evoluta mediante il costante rapporto con qualificati designer esterni che hanno permesso all'azienda il confronto con nuovi stimoli di ricerca.

La presenza di Ghidini nel dibattito che coinvolge il design del prodotto ormai largamente affermata come ci dimostrano alcune iniziative che sono di sicuro riferimento nel settore:

■ Il periodico *Manua*, rivolto ai progettisti ed agli operatori del settore, voluto per approfondire le relazioni tra progetto e tecnologia nel mondo delle maniglie, dei coordinati e dei serramenti.

■ Il concorso Internazionale di design *La maniglia per il III Millennio*, voluto per celebrare i 70 anni del azienda che ha consentito una efficace analisi delle tendenze produttive che aprono il nuovo millennio.

Da questo concorso nasce *Infinita*, una maniglia che risolve in un unico oggetto il rapporto tra placca e leva di manovra.

■ Il progetto *Leonardo* la pi significativa innovazione nel settore delle maniglie e risolve in una forma nuova i temi del design for all .

■ Leonardo ha vinto il premio *Vele d'Oro* ad *Expocon 2004* ed stato selezionato per la 19 Biennale di Lubiana, il Premio Costruire, le manifestazioni della Triennale di Milano e del museo della Scienza e della Tecnica, Design Parigi 2005, Piemonte Torino Design ed inoltre le conferenze EIDD.

■ DfA Italia (Design for All Italia, membro di EIDD - Design for All Europe) ha assegnato alla maniglia Leonardo il prestigioso marchio di qualit DfA per la sua possibilit di essere usata dalla pi ampia categoria di utenti senza porre barriere di tipo funzionale o psicologico.

A long tradition of research and manufacture, typical of the proto-industrial manufacture of the start of the last century, has accompanied the history of Ghidini Pietro Bosco right from its foundation.

The first founder was a skilled craftsman capable of creating new shapes who carefully researched innovations in technology and construction. Since 1929 Ghidini has gradually and constantly developed this characteristic creating a permanent research laboratory within the company: the Ghidini Experimental Office, dedicated to the development of new products and the definition of the most appropriate manufacturing techniques.

Since the eighties attention to design has developed by working constantly together with qualified external designers who have enabled the company to confront new incentives for research.

Ghidini's presence in the debate involving product design is now widely recognised as is shown by some initiatives which are a point of reference in this field:

- The magazine *Manua*, produced for designers and workers in this field, which was created to investigate the relationship between design and technology in the world of handles, coordinates and door and window frames.
- The International design competition *The handle for the III Millennium*, created to celebrate the company's seventy year anniversary which has enabled us to make an effective analysis of the manufacturing trends at the start of the new millennium. This competition led to the creation of *Infinita*, a handle which incorporates the plate and lever in just one object.
- The *Leonardo* project is the most significant innovation in the handles sector: with its new shape it answers to the theme design for all.
- Leonardo won the *Vele d'Oro* prize at Expocon 2004 and has been selected for the 19th Biennial Exhibition in Lubiana, the *Costruire* Prize, and for exhibition at the Triennial exhibition in Milan, the Museum of Science and Technology, Design Paris 2005, Piedmont Turin Design and furthermore the EIDD conferences.
- Dfa Italy (Design for All Italy, member of EIDD - Design for all Europe) has assigned to Leonardo handle the prestigious DFA quality marks for its ability to be used by the largest category of users without placing functional or psychological barriers.

## PROGETTO LEONARDO

Il Progetto Leonardo rinnova il rapporto con l'oggetto maniglia indirizzandolo verso un uso ampliato realmente utilizzabile da bambini, adulti, anziani o persone con sedia a ruote. Un disegno semplice e voluminoso determina con eleganza le forme della maniglia e consente l'impugnarla a diverse altezze. Una forma innovativa e gradevole risolve i temi dell'accessibilità e della praticità d'uso senza barriere formali o psicologiche.

Design for all = utenza universale

Il mondo della progettazione si è sempre rivolto ad un modello ideale di utente (ipotizzato già negli studi dell'uomo vitruviano di Leonardo e sino in tempi più recenti dal Modulor di Le Corbusier): un uomo di età media, di buona costituzione fisica che non ammette varianti. Il mondo reale invece è abitato da bambini, giovani, adulti ed anziani, pertanto anche senza tener conto di disabilità gravi l'utente reale non è in grado di usufruire pienamente ed in modo autonomo delle strutture ed i prodotti che la società gli offre. L'uomo di Leonardo non è superato ma deve essere integrato seguendo l'evoluzione di una società che più attenta alle esigenze di un design for all e cioè universale (per tutti gli utenti). Il progetto deve quindi rivolgersi verso un'utenza più ampia per soddisfare senza barriere fisiche o psicologiche le diverse esigenze abitative di una società reale. La normativa vigente in tema di accessibilità prevede che le maniglie delle porte, solitamente applicate dalla produzione di serie a 105 cm, sia collocata ad altezza 90 cm. Con la maniglia Leonardo si ha la possibilità di impugnare la maniglia a diverse altezze.

*The Leonardo Project takes a new look at our relationship with the handle as an object aimed at a wide range of uses. It really can be used by children, adults, old people and people in wheelchairs. A simple, voluminous design determines the elegant shape of the handle and makes it possible to grip it at different heights. An innovative and pleasing shape answers the need for accessibility and ease of use without formal or psychological barriers.*

DfA Italia (Design for All Italia, membro di EIDD - Design for All Europe) ha assegnato alla maniglia Leonardo il prestigioso marchio di qualità DfA.

DfA Italy (Design for All Italy, member of EIDD - Design for All Europe) has assigned to Leonardo handle the prestigious DFA quality marks for its ability to be used by the largest category of users without placing functional or psychological barriers.

## PROGETTO DE VENIERI

Ripercorrendo le antiche tecniche produttive delle botteghe artigiane e dei forni fusori, tradizionalmente operanti sulle sponde del fiume Mella, De Venieri ha compiuto una scelta culturale tanto coraggiosa quanto interessante: ricreare esattamente le forme e l'impatto estetico degli antichi manufatti in bronzo ed in ottone, adoperando materiali, tecniche e processi di finitura coerenti con i valori del progetto.

Ecco perch i manufatti non vengono neppure sottoposti a trattamenti di superficie moderni, lasciando bens", che progressivamente il metallo acquisisca una sua identit attraverso la patina del tempo ; qualcosa di unico e inconfondibile, per arredare case altrettanto personali ed esclusive.

*Each piece in the De Venieri line is scrupulously researched from historical sources in order to re-create both the form and aesthetic impact of true artefacts.*

*Once the design is perfect, it is modelled by hand following age old foundry and workshop techniques before being finely rendered in either red or white bronze and finished in one of the variety of applied treatments.*

*From that point onward, these living object begin to acquire their own individual identity, responding naturally to the various effects of use and environment and gradually taking on the Patina of Time .*

*Likewise, custom-designed articles can be realized with the utmost care and attention to detail befitting the most demanding clientele.*

## MATERIALI E FINITURE

**Ghidini Group** pu sicuramente vantare il pi ampio catalogo di soluzioni, materiali e finiture presenti sul mercato delle maniglie e dei suoi coordinati.

### OTTONE

L'ottone una lega industriale di rame-zinco, nella quale il tenore di zinco almeno del 50%. I primi utilizzi del rame e delle sue leghe risalgono a 5000 anni fa. Nel nostro caso la lega rappresenta una parte consistente della produzione e nei nostri stabilimenti viene trasformata dallo stato grezzo a semilavorati mediante processi di pressofusione, stampaggio a caldo, tranciatura e imbutitura, tornitura a seconda che si parta da lingotti, spezzoni di barra estrusa, lamiera, barra trafiletta.

### ZALOR

Zalor un marchio registrato con cui indichiamo la speciale lega di zinco, alluminio e magnesio particolarmente adatta per pressofusione con cui produciamo articoli che, dopo operazioni di finitura superficiale, vengono sottoposti a trattamenti galvanici di doratura, nichelatura, rodiatura, cromatura nonch all esclusivo trattamento GHI.CO.TEC.

### ALLUMINIO

L'alluminio sicuramente uno dei metalli non ferrosi pi interessanti grazie al suo basso peso specifico ed alla sua buona resistenza alla corrosione che viene notevolmente incrementata mediante ossidazione anodica ed ora anche con l'innovativo trattamento GHI.CO.TEC

### NYLON

Nylon la denominazione commerciale della poliammide 6.6, resina termoplastica sintetica con elevate propriet meccaniche e buona resistenza agli agenti chimici. Tutta la produzione in Nylon ottenuta mediante stampaggio per iniezione.

### ACCIAIO

L'acciaio una lega di ferro contenente carbonio fino a circa il 2% ed altri elementi che conferiscono al metallo determinate caratteristiche.

In base al loro impiego gli acciai vengono comunemente divisi in acciai di uso generale e acciai speciali. Gli acciai inossidabili (inox) appartengono a questa seconda categoria ed hanno resistenza all'ossidazione ed alla corrosione, caratteristiche determinate dalla presenza in lega di nichel e cromo.

## PRODUCTS AND FINISHES

**Ghidini Group.** can surely boast the largest catalogue of products, materials and finishes available on the handles and coordinates market.

### BRASS

Brass is an industrial alloy of copper and zinc, of which zinc makes up at least 50%. The first use of copper and its alloys dates back to 5000 years ago. In our case the alloy represents a consistent part of our production and in our factories it is transformed from the original state to semi-finished products using processes of die casting, hot pressing, blanking and drawing, and turning according to whether the product is manufactured from ingots, cut down sizes of extruded bars, sheet or drawn bars.

### ZALOR

Zalor is a registered trademark used to indicate a special alloy of zinc, aluminium and magnesium which is particularly suitable for die casting, used to produce articles which, after surface finishing operations, undergo galvanic treatments with gold, nickel, rhodium and chrome as well as our exclusive GHI.CO.TEC. treatment.

### ALUMINIUM

Aluminium is definitely one of the most interesting non-ferrous metals due to its low specific weight and its strong resistance to corrosion. This feature is considerably increased by means of anodic oxidisation and now also by using the innovative GHI.CO.TEC treatment.

### NYLON

Nylon is the trade name for 6.6 polyamide, a synthetic thermoplastic resin with high mechanical properties and strong resistance to chemical agents. All nylon products are made using injection presses.

**STEEL.** Steel is an iron alloy containing up to 2% carbon and other elements which give the metal certain characteristics.

### STEEL

Steels are commonly divided into steels for general use and steels for specific uses according to their final use.

Stainless steels belong to the second category and resist oxidisation and corrosion, a characteristic which is determined by the presence of nickel and chrome in the alloy.

## GHI.CO.TEC.

Nel 1995 entra in funzione il nuovo impianto per il trattamento denominato **GHI.CO.TEC.**, **Ghidini Coating Technology**, un nuovo modo di concepire protezione e colorazione di maniglie e coordinati in ottone, Zalor, alluminio.

Mediante un processo di cataforesi **GHI.CO.TEC.** deposita sul metallo resine che aderiscono ad esso per azione di un campo elettrico che si genera nelle vasche in cui i pezzi vengono immersi; con un successivo passaggio a forno la resina si indurisce ed il pezzo assume l'aspetto definitivo.

La resina di base trasparente ed incolore, ma con laggiunta di pigmenti potrebbe assumere qualsiasi colorazione. nel nostro caso utilizziamo la protezione incolore su ottone lucidato e quella gialla su Zalor ed alluminio.

Per l'ottone, **GHI.CO.TEC.**, dunque un'alternativa alla tradizionale verniciatura trasparente. Mentre per Zalor ed alluminio in un unico passaggio, il pezzo si colora, assumendo il tono dell'ottone, e si protegge dall'ossidazione e dall'usura con un deposito diretto sul metallo di base.

Il rivestimento ha uno spessore assolutamente uniforme e garantisce caratteristiche di resistenza ad usura e ossidazione superiori a quanto ottenibile con i trattamenti tradizionali.

Da non trascurare l'aspetto ecologico del processo che lavora completamente a ciclo chiuso, quindi senza scarichi nell'ambiente e senza sviluppo di fumi o sostanze nocive per gli operatori.

*In 1995 the new plant for the **GHI.CO.TEC.**, **Ghidini Coating Technology**, started working. This new plant is a new way to conceive protection and colouring of brass, Zalor or aluminium handles and co-ordinates. By means of a cataphoresis process, **GHI.CO.TEC.** deposits resins on metal and they adhere to it through an electric field which is generated in the bath tank where the pieces are dipped; with a further kiln step, the resin hardens and the piece takes the definite look.*

*The basic resin is transparent and colourless, but adding pigments, it can acquire any sort of colour.*

*In our case we use a colourless protection on polished brass and a yellow protection on Zalor or aluminium.*

*As far as brass is concerned, **GHI.CO.TEC.** is therefore a great change to the traditional transparent coating. Instead of treating Zalor and aluminium with the usual brass coating galvanized system, with a single **GHI.CO.TEC.** operation, it is possible to colour the article and at the same time give it the right protection from oxidation.*

*The coating is absolutely uniform as far as the thickness is concerned and guarantees those characteristics of hardness, adhesion, resistance to solvents and to corrosion in saline fog, with better results compared to those which could be reached by means of traditional treatments.*

*The ecological aspect has to be taken into account as well, being the process a closed cycle, therefore no emissions in the environment, no fumes or dangerous substances for the operators are developed.*

## G-PLUS

**Ghidini group**, proseguendo la propria ricerca che tende ad offrire i migliori caratteri tecnici e formali, presenta **G-PLUS**: il più aggiornato sviluppo della tecnologia PVD (Physical Vapour Deposition) applicata alle maniglie ed ai coordinati.

Superficie dura e compatta, grande resistenza alle abrasioni ed alle aggressioni atmosferiche ed un piacevolissimo colore vivo dell'ottone sono i caratteri che distinguono **G-PLUS**.

**G-PLUS** realizza rivestimenti ad elevate caratteristiche mediante condensazione sotto vuoto sulla base da rivestire di vapori ottenuti con fattori fisici.

**G-PLUS** prevede una reazione fisica tra ioni di zirconio Sche si depositano sulla base in ottone precedentemente nichelata e cromata. La generazione dei vapori avviene per effetto di una scarica ad arco sotto vuoto tra un catodo, ovvero la sorgente dei vapori stessi e la camera in cui avviene l'intero processo.

Le maniglie ed i coordinati trattati con **G-PLUS** godono di caratteristiche ampiamente superiori rispetto a quanto possibile con tutti i trattamenti tradizionali.

Prendendo come termine di confronto la cromatura galvanica otteniamo:

	<b>G-PLUS</b>	Cromatura galvanica
<b>Durezza in HV</b>	2600/2800	800
<b>Resistenza allo sfregamento</b>	600 passate	400 passate
<b>Resistenza alla corrosione in nebbia salina NSS UNI-ISO 9227</b>	1200 ore	700 ore
<b>Resistenza alla corrosione prova Cass-test CASS UNI-ISO 9227</b>	300 ore	180 ore

**G-PLUS** ha superato severi test di laboratorio che ci consentono di certificare:

- Aderenza 100% secondo la normativa UNI-ISO 4524/5
- Nessuna alterazione dopo 1000 ore di prova accelerata di resistenza alla luce secondo la normativa UNI 9397
- Nessun intacco da parte di acido cloridrico, solforico, nitrico, ossalico, acetico e citrico, soda e potassa caustica, cianuri e sgrassature alcaline a caldo.

I risultati di protezione del trattamento **G-PLUS** permettono, anche ai clienti più esigenti, di ottenere maniglie e coordinati con una superficie di durezza paragonabile all'acciaio, resistenza agli agenti atmosferici che ne permette l'uso anche in esposizioni esterne in ambienti aggressivi, brillantezza del colore dell'ottone grazie alla protezione inalterabile nel tempo, garanzia illimitata perché la protezione offerta supera anche i limiti di garanzia previsti per legge.

## G-PLUS

Carrying on their research in order to offer the best technical and formal features, **GHIDINI group** are presenting **G-PLUS**: the most up to date technological development: PVD (Physical Vapour Deposition) applied to handles and co-ordinates.

Hard and compact surface, great abrasion proof, atmospheric aggression resistant and a very pleasant vivid brass colour are the features which distinguish **G-PLUS**.

**G-PLUS** is the result of the most innovative deposition technique PVD, by means of which it is possible to carry out coatings having high features through vacuum condensation of vapours obtained with physical factors on the surface to be coated. In the **G-PLUS** case, a physical reaction among zirconium ions (ZrN) which are deposited on the brass surface previously nickel and chromium plated is foreseen. The vapours are originated by means of vacuum discharge pressure between a cathode, that is the source of vapours and the chamber in which the entire process takes place. The handles and coordinates treated with **G-PLUS** have characteristics which are vastly superior compared to what obtainable by means of traditional treatments.

**G-PLUS** underwent severe laboratory tests which allow us to certify:

- 100% adhesion according to UNI-ISO 425415 Norm.
- No alterations after a 1000 hour accelerated resistance to light test according to UNI 9397 norm.
- No indentation was caused by using hydrochloric, sulphuric, nitric, oxalic, acetic and citric acids, caustic soda and potassium hydroxide, cyanide and alkaline and hot degreasing.

The protective results of **G-PLUS** treatment allow, even to the most demanding customers, to obtain handles and coordinates with a hardened surface which can be compared to steel, which is resistant to external atmospheric agents and which can be placed externally even in saline fog. Thanks to the inalterability of protection, the brass colour brightness doesn't change and an unlimited guarantee due to protection which goes even beyond the limit guarantee foreseen by the law.

**G-PLUS** a protection unlimited guaranteed for people who want beautiful long lasting handles.

La norma **EN 1906** definisce i requisiti e i metodi di prova per maniglie e pomoli per porte.

Vengono definiti i parametri che definiscono le prestazioni.

La tabella di classificazione una stringa alfanumerica composta da 8 caratteri.

1	2	3	4	5	6	7	8
Categoria d'utilizzo	Durabilità	Massa della porta	Resistenza al fuoco	Sicurezza (personale)	Resistenza alla corrosione	Sicurezza (contro effrazione)	Tipo di azionamento

**1 (prima casella) Categoria d'utilizzo:** Le guarniture sono suddivise in 4 categorie d'utilizzo (da 1 a 4), assegnate in riferimento alla frequenza d'utilizzo e al relativo campo applicativo.

1: Utilizzo di media frequenza delle guarniture, da parte di persone che sostanzialmente esercitano un utilizzo accurato e presentano un rischio ridotto per quanto riguarda l'uso non corretto (ad esempio per le porte interne di abitazioni).

Momento di torsione	Trazione	Gioco assiale in posizione di non utilizzo	Gioco perpendicolare sulla maniglia
* 20 Nm	300 N	< 10 mm	< 10 mm

2: Utilizzo di media frequenza delle guarniture, da parte di persone che esercitano un utilizzo sostanzialmente accurato ma che presentano un certo rischio per quanto riguarda l'uso non corretto. (ad esempio per le porte interne di uffici).

Momento di torsione	Trazione	Gioco assiale in posizione di non utilizzo	Gioco perpendicolare sulla maniglia
* 30 Nm	500 N	< 10 mm	< 10 mm

3: Utilizzo ad elevata frequenza delle guarniture, da parte del pubblico o di altre persone, che non hanno particolare cura nell'uso e per le quali esiste un notevole rischio d'utilizzo errato. (ad esempio per le porte di edifici pubblici notevolmente frequentati).

Momento di torsione	Trazione	Gioco assiale in posizione di non utilizzo	Gioco perpendicolare sulla maniglia
* 40 Nm	800 N	< 6 mm	< 5 mm

4: Per impiego su porte che vengono azionate spesso e con forza (ad esempio per porte in stadi da calcio, su piattaforme petrolifere, nelle caserme, toilette pubbliche, ecc).

Momento di torsione	Trazione	Gioco assiale in posizione di non utilizzo	Gioco perpendicolare sulla maniglia
* 60 Nm	1000 N	< 6 mm	< 5 mm

**2 (seconda casella) Durabilit** : viene inserita la classificazione 6 o 7, 6 = 100.000 cicli di prova , 7 = 200.000 cicli di prova

**3 (terza casella) Massa della porta:** Non utilizzata.

**4 (quarta casella) Resistenza al fuoco:** 0, A, B o C

0 = non adatta per porte tagliafuoco ed antifumo

A = adatta per porte antifumo

B = adatta per porte tagliafuoco ed antifumo

C = adatto per porte tagliafuoco e antifumo, obbligo di un anima in acciaio nella maniglia

**5 (quinta casella) Sicurezza personale:** 0 o 1.

(opzionale per cui in questa casella possibile anche inserire uno 0)

0 = per uso normale

1 = per uso con requisiti di sicurezza . (Secondo DIN 18255, tutte le guarniture per gli edifici pubblici devono superare questa prova corrispondente alle categorie 3 e 4)

**6 (sesta casella) Resistenza alla corrosione:** da 0 a 5.

0 = nessuna resistenza alla corrosione

1 = resistenza ridotta alla corrosione (test nebbia salina 24 h)

2 = resistenza media alla corrosione (test nebbia salina 48 h)

3 = resistenza alta alla corrosione (test nebbia salina 96 h)

4 = resistenza molto alta alla corrosione (test nebbia salina 240 h)

5 = resistenza estremamente alta alla corrosione (test nebbia salina 480 h)

**7 (settima casella) Sicurezza contro l'effrazione:** da 0 a 4.

0 = nessuna resistenza allo scasso

1 = ridotta resistenza allo scasso

2 = media resistenza allo scasso

3 = notevole resistenza allo scasso

4 = resistenza estremamente alta allo scasso

**8 (ottava casella) Tipo di azionamento:** A, B o U.

A = guarnitura con molla

B = guarnitura con precarico a molla

U = guarnitura senza molla

**ESEMPIO : guarnitura in alluminio con finitura GHI.CO.TEC, assistita da molla.**

(1) Categoria d'utilizzo	(2) Durabilit	(3) Massa della porta	(4) Resistenza al fuoco	(5) Sicurezza personale	(6) Resistenza alla corrosione	(7) Sicurezza effrazione	(8) Tipo di azionamento
3	7	-	0	0	5	0	B

The **EN 1906** standard defines requirements and test methods for door handles and knobs..

The parameters defining the performance are specified below.

The classification table is an alphanumeric string made up of 8 characters.

1	2	3	4	5	6	7	8
Category of use	Durability	Door mass	Fire Resistance	Personal Safety	Corrosion Resistance	Security (in terms of burglary resistance)	Type of operation

**1 (first digit) Category of use:** Handle sets are classified into 4 categories of use (ranging from 1 to 4), depending on frequency and expected area of use.

1: Medium frequency of use of handle sets, by people with a high incentive to exercise care and with a small chance of misuse (e.g. internal residential doors).

Rotational Torque Strength Test	Axial Strength Test	Free Play at rest	Free Angular Movement
* 20 Nm	300 N	< 10 mm	< 10 mm

2: Medium frequency of use of handle sets, by people with some incentive to exercise care but where there is some chance of misuse.  
(e.g. internal office doors).

Rotational Torque Strength Test	Axial Strength Test	Free Play at rest	Free Angular Movement
* 30 Nm	500 N	< 10 mm	< 10 mm

3: High frequency of use of handle sets, by the general public or by other people with little incentive to exercise care and with a high chance of misuse.  
(e.g. doors of highly frequented public buildings).

Rotational Torque Strength Test	Axial Strength Test	Free Play at rest	Free Angular Movement
* 40 Nm	800 N	< 6 mm	< 5 mm

4: Per impiego su porte che vengono azionate spesso e con forza (ad esempio per porte in stadi da calcio, su piattaforme petrolifere, nelle caserme, toilette pubbliche, ecc).

Rotational Torque Strength Test	Axial Strength Test	Free Play at rest	Free Angular Movement
* 60 Nm	1000 N	< 6 mm	< 5 mm

**2 (second digit) Durability:** the classification figure is either 6 or 7, 6 = 100,000 test cycles, 7 = 200,000 test cycles

**3 (third digit) Door Mass:** not applicable.

**4 (fourth digit) Fire Resistance:** 0, A, B or C

0 = not approved for use on fire/smoke doors

A = suitable for use on smoke doors

B = suitable for use on fire/smoke doors

C = suitable for use on fire/smoke doors, steel core in the handle is required

**5 (fifth digit) Personal Safety:** 0 or 1.

as this is optional, the figure 0 may appear)

0 = normal use

1 = to be used in safety applications. (According to DIN 18255, all handle sets for public buildings - i.e. items included in categories 3 and 4 - must pass this test)

**6 (sixth digit) Corrosion Resistance:** ranging between 0 and 5.

0 = no corrosion resistance

1 = mild corrosion resistance (24-hr salt-spray test)

2 = moderate corrosion resistance (48-hr salt-spray test)

3 = high corrosion resistance (96-hr salt-spray test)

4 = very high corrosion resistance (240-hr salt-spray test)

5 = extremely high corrosion resistance (480-hr salt-spray test)

**7 (seventh digit) Security (in terms of burglary resistance):** ranging between 0 and 4.

0 = not approved for use on burglary resistant doors

1 = mild burglary resistance

2 = moderate burglary resistance

3 = high burglary resistance

4 = very high burglary resistance

**8 (eighth digit) Type of operation:** A, B or U.

A = spring assisted handle set

B = spring loaded handle set

U = unsprung handle set

**EXAMPLE: spring assisted aluminum handle set with GHI.CO.TEC. coating**

(1) Category of use	(2) Durability	(3) Door Mass	(4) Fire Resistance	(5) Personal Safety	(6) Corrosion Resistance	(7) Security (burglary)	(8) Type of operation
3	7	-	0	0	5	0	B

## PROVE E CERTIFICAZIONI IN RIFERIMENTO ALLA NORMATIVA GENERALE UNI EN 1906 *TESTING AND CERTIFICATION WITH REFERENCE TO THE GENERAL RULE UNI EN 1906*

### RESISTENZA ALLA CORROSIONE *CORROSION RESISTANCE*

UNI EN 1670 - Resistenza alla corrosione: la norma specifica i requisiti di resistenza alla corrosione degli accessori per porte, finestre, chiusure oscuranti e facciate continue. Si applica anche agli elementi di collegamento metallico richiesti per il fissaggio degli accessori per serramenti.  
Eseguiamo prove certificate da ente esterno e prove interne con una moderna camera in nebbia salina.

I nostri prodotti sono testati e classificati in riferimento alle normative:

- UNI EN ISO 1670
- UNI EN ISO 9227

*UNI EN 1670 Resistance to corrosion: the standard specifies requirements for corrosion resistance of accessories for doors , windows, shutters and curtain walls.*

*It also applies to metal fasteners required for attachment of accessories for doors.*

*We perform tests certified by an external organization and we perform also in house tests by a salt spray chamber machinery.*

*Our products are tested and classified with reference to the following standard:*

- UNI EN ISO 1670
- UNI EN ISO 9227

## DURABILIT DURABILITY

UNI EN 1906 - Durabilit : i nostri prodotti vengono sottoposti a prove di durabilit con test e attrezzature interne, e i risultati (> 280.000 cicli) superano di gran lunga le richieste della normativa:

- frequenza d'uso media: 100 000 cicli.
- frequenza d'uso elevata: 200 000 cicli.

*UNI EN 1906 Durability: our products are tested for durability with internal test and equipment, and the results (>280.000 cycles) exceed the requirements of the legislation.*

- Average frequency of use: 100.000 cycles
- High frequency of use: 200.000 cycles

## RESISTENZA AL FUOCO FIRE RESISTANCE

UNI EN 1634 - Resistenza al fuoco: i prodotti da utilizzare su porte tagliafuoco / antifumo devono essere conformi ai requisiti appropriati della UNI EN 1906 e ai requisiti supplementari della norma UNI EN 1634.

*Uni EN 1634 Fire resistance : products for use on fire/smoke door must comply with requirements of EN 1906 and to the additional requirements of UNI EN 1634*

## PRECAUZIONI PER INSTALLATORI ED UTILIZZATORI FINALI

Protezione dall'acido tannico: nelle finestre e porte-finestre in legno di rovere o altre essenza con un elevato contenuto di tannino, assicurarsi che questo non possa evaporare dal legno. La guarnitura non deve avere contatto diretto con una superficie del legno non trattato.

Protezione da sigillante: non utilizzare mai sigillanti a reticolazione acetica o contenenti altre sostanze aggressive, ad esempio acido formico o acetico, composti di ammoniaca, aldeide, fenoli, cloro, tannino ecc., perch sia il contatto diretto con il sigillante che i vapori di queste sostanze possono aggredire la superficie dei particolari.

Durante i lavori in genere, demolizione, ristrutturazione, realizzazione di intonaci e tinteggiatura, riparare le guarniture (comunque tutti i nostri prodotti) dal contatto con polveri, calce, intonaco, tempere e smalti vari. Fare aerare bene il locale prima di togliere le protezioni, il consiglio se possibile sarebbe di montare le guarniture dopo aver eseguito i lavori e dopo essersi assicurati che il locale sia stato ben aerato.

Pulizia e protezione da detergenti aggressivi contenenti acidi: pulire le guarniture esclusivamente con panno morbido e detergenti a pH neutro diluito. Non usare mai detergenti o abrasivi aggressivi contenenti acidi. Questi potrebbero danneggiare le guarniture.

**La non osservanza delle suddette indicazioni pu causare danni irreparabili al prodotto.**

## PRECAUTIONS FOR INSTALLATION AND CONSUMERS

Tannic acid protection: in the windows and glass doors in oak or other trees with a high tannin content, make sure that this can not evaporate from the wood. The crank should not have direct contact with a surface of untreated wood.

Sealant protection: Do not use any sealant acetic or other aggressive substances such as formic acid, acetic acid, ammonia compounds, aldehyde, phenol, chlorine, tannin etc., for a direct contact with the sealant, the vapors of these substances can damage the finishings of the products.

During general maintenance, demolition, renovation, plastering and painting, repairing the cranks (though all of our products) from contact with dust, lime, plaster, tempera and various glazes. Make sure the rooms are ventilated enough before removing the protections. The best advice if possible is to mount the cranks after performing other works and after making sure that the premises was well aerated.

Cleaning and protection from detergents containing acids: clean the cranks only with soft cloth and neutral pH detergent diluted. Never use harsh or abrasive cleaners containing acids. These could damage the crank.

**The non-observance of these instructions may cause irreparable damage to the product.**

## ROS 45x9

- supporto in polimero
- molla tradizionale dx o sx
- maniglia solidale
- non predisposta per viti passanti

- plastic support
- standard spring lh/rh
- handle fixed on the rose
- not available for through bolts

## ROS 45x9 NOVECENTO

- supporto in polimero
- molla tradizionale dx o sx
- maniglia solidale
- non predisposta per viti passanti

- plastic support
- standard spring lh/rh
- handle fixed on the rose
- not available for through bolts

## ROS 50x7-0005

- supporto in polimero
- molla tradizionale dx o sx
- maniglia solidale
- predisposta per viti passanti interasse mm 38 autofilettanti o metriche

- plastic support
- standard spring lh/rh
- handle fixed on the rose
- available for through bolts - self-drilling screw/metric screws

VL=viti legno  
VL=wood screws

VPA=viti passanti autofilettanti  
VPA=through bolts self-drilling screws

VPM=viti passanti metriche  
VPA=through bolts metric screws

## ROS 545

- supporto in polimero

## DK-1P

- Gioco in plastica senza bussole/bussole D.9,5/bussole D.11,5
- Rosetta ovale/rettangolare
- Maniglia fissata con grano
- Possibilità di avere 8 scatti
- Sporgenza ferro Q.7 standard: mm 40
- Sporgenze ferro Q.7 a richiesta: mm 30/33/35/45/50

*● plastic mechanisme without pins/ with pins D.9,5/ with pins D11,5*  
*● oval rose/rectangular rose*  
*● lever handle fixed by grub screw*  
*● availability of 8 positions ( 45° )*  
*● standard projection of spindle: 7 x 40 mm*  
*● on request projection of the spindle: 7 x 30/33/35/45/50 mm*

## DK-2P

- Gioco in plastica senza bussole/bussole D.9,5/bussole D.11,5
- Rosetta ovale/rettangolare
- Maniglia solidale senza grano
- Possibilità di avere 8 scatti
- Sporgenza ferro Q.7 standard: mm 40-35
- Sporgenze ferro Q.7 a richiesta: mm 45-40/35-30

*● plastic mechanisme without pins/with pins D.9,5 mm/ with pins D11,5*  
*● oval rose/rectangular rose*  
*● lever handle fixed*  
*● availability of 8 positions (45°)*  
*● standard projection of spindle: 7x 40-35 mm*  
*● on request projection of the spindle: 7 x 45-40mm/35-30mm*

## DK-1F

- Gioco in ferro con bussole D.9,5
- Rosetta ovale/rettangolare
- Maniglia fissata con grano
- Disponibile solo con 4 scatti
- Sporgenza ferro Q.7 standard: mm 35
- Sporgenze ferro Q.7 a richiesta: mm 30/40

*● iron mechanisme with pins D.9,5 mm*  
*● oval rose/rectangular rose*  
*● lever handle fixed by grub screw*  
*● available only with 4 positions ( 90° )*  
*● standard projection of spindle: 7 x 35 mm*  
*● on request projection of the spindle: 7 x 30-40mm*

## DK-2F

- Gioco in ferro con bussole D.9,5
- Rosetta ovale/rettangolare
- Maniglia solidale senza grano
- Possibilità di avere 8 scatti
- Sporgenza ferro Q.7 standard: mm 40-28

- *iron mechanism with pins D 9,5 mm*
- *oval rose/rectangular rose*
- *fixed handle*
- *availability of 8 positions (45°)*
- *standard projection of spindle 7 x 40-28 mm*

## DK-3P

- Gioco in plastica senza bussole/bussole D.9,5/bussole D.11,5 a vista sui lati
- Rosetta rettangolare rotante
- Maniglia solidale senza grano
- Possibilità di avere 8 scatti
- Sporgenza ferro Q.7 standard: mm 40
- Sporgenze ferro Q.7 a richiesta: mm 30/33/35/45

- *plastic mechanism without pins/with pins D.9,5 mm/ with pins D11,5*
- *rotating rectangular rose*
- *lever handle fixed without grub screw*
- *availability of 8 positions (45°)*
- *standard projection of spindle: 7 x 40 mm*
- *on request projection of spindle: 7 x 30/33/35/45 mm*

## DK-4P

- Gioco in plastica senza bussole/bussole D.9,5/bussole D.11,5 a vista sui lati
- Rosetta ovale rotante
- Maniglia solidale senza grano
- Possibilità di avere 8 scatti
- Sporgenza ferro Q.7 standard: mm 40
- Sporgenze ferro Q.7 a richiesta: mm 30/33/35/45

- *plastic mechanism without pins/with pins D.9,5 mm/pins D11,5*
- *rotating oval rose*
- *fixed handle without grub screw*
- *availability of 8 positions (45°)*
- *standard projection of spindle: 7 x 40 mm*
- *on request projection of spindle: 7 x 30/33/35/45 mm*

## DK-SIC/P

- Sistema di sicurezza con bussole D.9,5 abbinato a DK-2P senza bussole
- Rosetta ovale
- Maniglia solidale senza grano
- Disponibile solo con 4 scatti
- Sporgenza ferro Q.7 standard: mm 40
- Sporgenze ferro Q.7 a richiesta mm 30/35/45
- *safety system with pins D. 9,5mm in addition to DK-2P without pins*
- *oval rose*
- *fixed handle without grub screw*
- *available only with 4 positions (90°)*
- *standard projection of spindle: 7 x 40 mm*
- *on request projection of spindle: 7 x 30/35/45 mm*

## DK-SIC/F

- Sistema di sicurezza con bussole D.9,5 abbinato a DK-1F con bussole D.9,5
- Rosetta ovale
- Maniglia fissata con grano
- Disponibile solo con 4 scatti
- Sporgenza ferro Q.7 standard: mm 40
- Sporgenze ferro Q.7 a richiesta: mm 30/35/45
- *safety system with pins D. 9,5mm in addition to DK-1F with pins*
- *oval rose*
- *fixed handle by grub screw*
- *available only with 4 positions (90°)*
- *standard projection of spindle: 7 x 40 mm*
- *on request projection of spindle: 7 x 30/35/45 mm*

## SISTEMA RG

- Sistema di sicurezza per DK con chiusura a cilindro
- Movimento con bussole D.9,5 in lega di zinco pressofusa grezza
- Cilindro e chiave in lega di zinco pressofusa e nichelata
- Copertura in ottone varie finiture
- Maniglia fissata con grano
- Disponibile solo con 4 scatti
- Sporgenze ferro Q.7 disponibili: mm 31/35/42
- *safety system for Dk with cylinder*
- *zinc - alloy die casted mechanism with pins D.9,5*
- *cylinder and key , nickel - plated*
- *brass cover in different finishing*
- *lever handle fixed by grub screw*
- *available only with 4 positions (90°)*
- *on request projection of spindle: 7 x 31/35/42 mm*

## CONDIZIONI GENERALI DI VENDITA

### **PREZZI:**

Il prezzo di listino è riferito a N°1 pezzo dell'articolo con codice ad esso riferito IVA esclusa con resa franco partenza e imballo quantificato nella misura del 1% dell'imponibile in fattura.

### **SPEDIZIONI:**

La merce viaggia in ogni caso a rischio e pericolo del committente.

In assenza di precise istruzioni circa il mezzo di inoltro della merce le spedizioni sono eseguite nel modo ritenuto più idoneo ed economico senza nessuna responsabilità della Casa.

### **PAGAMENTI:**

Devono essere effettuati direttamente al domicilio della nostra sede o mediante estinzione di nostre ricevute bancarie entro la scadenza concordata. Eventuali ritardi comportano il conteggio degli interessi di mora.

### **ORDINI:**

Tutti gli ordini devono essere inoltrati ai nostri agenti di zona utilizzando codici e descrizioni corrette di quanto richiesto.

Eventuali ordini inviati direttamente alla nostra sede sono accettati solo se trasmessi a mezzo telefax e completi di codici e descrizioni corretti di quanto richiesto.

Ogni articolo richiesto in quantità inferiore al numero di pezzi previsti nella confezione standard subirà un aumento prezzo del 10%.

Tutti gli ordini, in ogni caso, sono subordinati all'approvazione della Casa.

### **FATTURAZIONE:**

Il minimo importo netto merce fatturabile è di € 150,00.

### **TERMINI DI CONSEGNA:**

Il termine di consegna e di spedizione, anche se confermato, costituisce una semplice previsione ed ha perciò un valore indicativo, quindi non comporta nessuna garanzia e nessun indennizzo è dovuto per la mancata consegna nel termine previsto.

### **ARTICOLI:**

Tutti gli articoli presentati con il precedente Listino Illustrato 2012, ma non citati in questa edizione sono usciti di produzione, pertanto eventuali ordini in corso saranno evasi fino ad esaurimento delle scorte.

Ogni variante rispetto agli articoli a listino è da considerarsi prodotto speciale per il quale, di volta in volta, è necessario richiedere fattibilità, quantità minima, prezzo.

La fornitura di prodotti speciali a richiesta è subordinata all'accettazione da parte del committente della relativa conferma d'ordine.

La Casa si riserva il diritto di approvare modifiche agli articoli e variazione dei prezzi senza preavviso.

## CONDIZIONI GENERALI DI VENDITA

### RESI:

Non si accettano resi di merce standard, se non espressamente autorizzati dalla Casa.

Le contestazioni, comunque, devono essere fatte entro 8 giorni dal ricevimento della merce.

Le richieste di reso devono pervenire a mezzo fax, verranno analizzate ed eventualmente autorizzate mediante apposita "**Scheda di Autorizzazione Reso**" indicante tutte le modalità e condizioni alle quali verrà accettato il reso. Qualsiasi reso pervenuto senza preavviso ed autorizzazione verrà respinto al mittente.

Per prodotti speciali approntati a richiesta non si accettano resi per alcun motivo.

Per qualsiasi controversia è competente il Foro di Brescia.

## GENERAL TERMS AND CONDITIONS OF SALE

### **ORDERS:**

All direct and indirect Orders are subject to our approval and cannot be revoked by the Buyer.

### **DELIVERIES:**

The delivery terms are approximate. In case of delays in the execution of an Order or partial shipments, the Seller will not be liable for damages.

### **SHIPMENTS:**

Even if the goods are supplied free destination, they are forwarded at the exclusive risk of the Buyer who is obliged to collect them. In case of non-collection the damages ensuing from this will be entirely at the Buyer's expense.

### **CLAIMS:**

No claims can be considered unless made within seven days of delivery of the goods. In case of a recognized imperfection of the product, it will be replaced, on the understanding that it has not been put into use.

### **PAYMENTS:**

All payments must be made within the terms agreed upon and exclusively to our domicile. In case of delays the Seller will be entitled to a Credit Surcharge of three percent above the official interest rate.

Discounts or deductions are not accepted, unless previously authorized.

### **JURISDICTION:**

For any controversy the only competent instance is the Court of Justice of Brescia.
